

How to Make Money by Selling Study Materials through Freelansas

How Can I make money?

Freelansas provides a marketplace or platform where as a vendor you can sell your study materials. You can make money by selling study material such as study notes, text book summaries, research paper samples, assignments, essays, case study samples, drawings, college notes, presentations, podcasts, class notes, study guides, manuals, e-book, course notes, judgments, question-answers, and other downloadable study documents. Importantly, the study material must be downloadable. Materials for all study levels (college, undergraduate, master's, doctorate, professional exams) are accepted.

However, you cannot sell study materials/products that require physical delivery or shipping.

Study materials that mostly contain words must also be typed up (not scans). Also, you **cannot** sell materials that meet the following criteria:

- Physical (non-downloadable) materials/items, illegal materials,
- Material that violate our intellectual property rights (such as lecture handouts, or notes your professor gives)
- Material that violate the intellectual property rights of other parties
- Material that contains false or misleading information
- Any material that falls in the domain of “Prohibited Uses” in our terms and conditions

How Do I Start?

To sell your products (study materials), you first need to create a vendor's account. To create a vendor account, go to the Vendor Registration page on the website, fill in and submit the registration form and wait for us to approve your account. Creating a vendor account is free of charge and is simple and straight forward. Once you create a vendor account on the website, we will be automatically notified. We will have to approve your account manually before you can proceed. Approval of your vendor account will typically be done in a few hours but may also be done within a few minutes.

Fill in Storefront Details

After your account has been approved, you need to create your storefront. This basically involves providing some details to set up your virtual store. Filling in your storefront details is an easy process. You do not need to fill in all storefront details to start selling. Details such as logo, store description, social media details, message to buyer, store location are optional and in fact may not be really necessary.

Upload the Document/Material That You Want To Sell

Once you have created a vendor account, you will need to upload the document or material you wish to sell. To do so, you will need to create a product on the site. Here is the procedure for creating a product on the site:

Log into your vendor account through the Vendor Dashboard page.

1. Click the “Add Product” button or icon and then click the “create a new product” link
2. Select a relevant category from the list of available categories. You may only select one category even though your product may fall into multiple categories.
3. You will be taken to the “Edit product” page where you will enter the relevant details of the product.
4. **Product Title:** Enter a relevant title for your product. The title should be a few words long
5. **Short product description:** Under the short product description field, provide a short description of your product including its title, when the product was created/last updated, number of pages, number of words, type of work, file type, and download information as in the example below.

Note: Always use the default font settings (Georgia font, size 12, paragraph level).

Title: PESTLE Analysis for Courier Services in the UK

Published/Last Updated: 2019

Total Pages: 19

Word Count (Excluding Exec Summary, references): Approx. 2,830 words

References: Included

Document Type: Research Paper Example

File Type/Format: PDF

Download Limit: Unlimited

Download Link Expiry: 60

6. **Product Description:** In the product description field, provide a detailed description of your product. If your product is a sample paper, you may include the question that the paper is seeking to answer or the paper instructions. You should also provide a short preview of the paper/work to give the potential buyer a glimpse of what they will be purchasing. Ideally, this section should be at least 300 words long.

Product Type: Select simple product and select (tick) both “Virtual” and “Downloadable” products.

Set the prices for the product. The “Regular price” is optional. The actual price you want the product to be sold at is the “Sale price” and so it is the more important price. If you choose to set a Regular price, this price should be higher than the Sale price.

Add downloadable file: This is an important step as it is here that you upload the file(s) that you are actually selling. Your product may include one or more files. If the “Downloadable files” field does not show, you probably did not select “downloadable” product in the previous step. Click on the upload file icon (6) and select and upload the file from your computer or other drive to the website’s media library. Once the file has been successfully uploaded, on the media library select the file you have uploaded and click the “Insert file URL” button. The File URL will be automatically inserted in the URL link. Now write the name of the file in the File Name field. If there are additional files to be uploaded, repeat the process until all the files have been uploaded.

Download limit: Leave blank (don’t write anything)

Download Expiry: Leave blank (don’t write anything)

Upload image(s): It is recommended that you upload an image related to your product. The image may be a screenshot of the title page of your file or a relevant picture that you have created yourself (not downloaded from the Internet due to copyright issues). It is important that the image you upload is adequately clear and looks professional.

Product Tags: Enter product tags in the tags field. Product tags are key words or phrases (ideally 3-5 words long) that relate to your product. Think of phrases (a group of words) that a potential buyer will use to search your product on the Internet. Each keyword phrase or product tag is entered on its own line. For example, if your product is on “PESTLE Analysis for Courier Services in the UK”, your product tags may be:

- PESTLE Analysis for Courier Services
- PESTLE Analysis Courier Services UK
- Courier Services UK PESTLE analysis
- Courier Services UK PESTEL analysis
- Courier Services PESTLE analysis

Inventory, Linked Products, Attributes, Advanced: Leave as they are (maintain default settings). Once you have entered all the relevant product details, click the “Submit” button at the top of the page to upload the product ready for publishing. You may also save the product as a Draft and complete it later by clicking the “Draft” button.

Approval: Once you submit your product, we shall review it, request or make any necessary changes to the product advert and publish it if it meets our criteria.

How long will it take for my product to be approved?

Approval of your product will typically be done within 48 hours of you creating the product.

Approval may take longer depending on our workload. For your product to be approved, it must

be of high quality. You can only post/upload material that you have created, not someone else's work/creation unless you have their express consent.

What Next

After successfully publishing your product on the website, you can increase the chances of your product being brought by marketing it on social media platforms. You earn money every time someone buys your product/study material.

Need More Information?

For more information please check out Frequently Asked Questions (FAQ) page at <https://freelansas.com/faq-1/> . This page contains information on some of the questions that sellers are most interested knowing. For additional information, feel free to contact us by email, Whatsapp, or through the website's contact form.

Happy Vending

Thanks for choosing Freelansas. Happy vending.
